Press Release

June, 2012

Intrinsic Perennial Gardens, Inc. is excited to announce the introduction of our first vegetative cultivar of Big Bluestem. **Andropogon gerardii 'Indian Warrior' PPAF** is a native ornamental grass that we developed for more substantial and darker grey green colored foliage along with burgundy red tips in Spring. In August with cool nights the red tips return and add to the red flowers and stems. As fall progresses the color deepens until October when plants are almost entirely red. The upright clumping plants grow 6' tall and prefer a well drained soil in full sun. Their hardiness is zone 3-9. For more information contact Brent Horvath at 800-648-2788 ext. 15 or brent@intrinsicperennialgardens.com. Picture attached to email.
