Press Release

July, 2010

Intrinsic Perennial Gardens, Inc. is excited to announce a new Cranesbill. **Geranium soboliferum** 'Butterfly Kisses' is a fall blooming Geranium. The pink flowers have deeper pink almost magenta veins and start blooming in September, continuing around three to four weeks. These substantial sprawling plants reach around 18-24" tall and 36" wide and prefer a well drained soil in full sun. Fall color is an added interest with some red and orange foliage in October. Their hardiness is zone 5-9. For more information contact Brent Horvath at 800-648-2788 ext. 15 or brent@intrinsicperennialgardens.com
