Press Release

March, 2007

Intrinsic Perennial Gardens, Inc. is excited to announce the introduction of a new Lobelia plant. **Lobelia cardinalis 'Golden Torch' PPAF** is a golden leaved form of the native Lobelia cardinalis. In July the bright red flowers stand out against the bright foliage. The plants range in size from 24-36"+ tall. They prefer a moist well drained soil in full sun to light shade. The red flowers will attract hummingbirds. Their Hardiness is zone 4-9. For more information contact Brent Horvath at 815-648-2788 or brent@intrinsicperennialgardens.com.

Liners are available exclusively at Terra Nova Nurseries. www.terranovanurseries.com
