Press Release

April, 2007

Intrinsic Perennial Gardens, Inc. is excited to announce the introduction of a new dwarf Fountain Grass, **Pennisetum alopecuroides 'Piglet' PPAF**. This new dwarf fountain grass was selected for its vigor and more substantial flowers for its size. The plants reach a mature size of 18" tall and 24" wide and begin to flower in August. They prefer a well drained soil in full sun. Their Hardiness is zone 5-9. For more information contact Brent Horvath at 815-648-2788 or brent@intrinsicperennialgardens.com.
